

Lighting led B Light for the Japanese restaurant Sushita

Sunday, March 9th, 2014 - Lighting

The Japanese restaurant Sushita, which is located in Ancona, **LED lighting** offers an interesting, proposed by B Light: discover together the design of this system for the illumination produced at the restaurant capital of the Marches.

The Japanese restaurant Sushita in Ancona can now boast a very elegant **lighting design**, Led the company made equipment B Light: This is a design that characterizes the entire location, for a final effect is very refined, as well as effective way to brighten up any space and give elegance to any room.

B Light has developed the project in collaboration with the lighting designer Stefano Dall'Osso, with their LED lights to create a calm atmosphere meditative, allowing customers to dine and lunch immersed in the beauty of Japanese culture. And of course its cuisine.

Lighting led fixtures

The appliances Led, controlled by a dimmer control that changes its intensity, illuminate the kaiten, the belt which transports the food: were used 30 devices with built-in optical anti-glare back, built-in installation composed by a shower of wooden pendants, for effective play of light and shadow.

On the tables, there are 18 built-in appliances, while other linear LED profiles we find them also along the walls of the restaurant. Several pendants that adorn the ceiling mounted luminaires recreate the theme of rain.

Obviously, the entire project also aims to protect the environment and to save the restaurant on the lighting, since they were used only in equipment of the latest generation LEDs controlled by a home automation system that can create different lighting scenarios.
