**B Light's Inside 65R recessed LED luminaire achieves 50,000-hr l**

by Administrator | [post a comment](#)

This product is part of the “Invisibles” family, luminaires that perfectly fits in the architecture up to the point of vanishing, leaving light to be the main protagonist.

Inside 65R is a ceiling in-line recessed light, with recessed glare-free optics, characterized by a round shape and a minimalistic design; it is perfect to achieve a brushing light, discreet and controlled, magically coming out of a point on the ceiling to embrace the whole ambience.

Featuring a direct light distribution with various beam apertures, Inside 65R gives an invisible touch of class to the surroundings, for a functional minimalism that aims to the full and undisturbed fruition of light.

The body of this innovative luminaire has a diameter of 46 mm, a length of 90 mm, with a 60 mm sleeve. Inside 65R can be installed inside 13 mm-thick plasterboard walls through an aluminium case.
